# AMI COOLING SYSTEM

## infrastructure

We believe - "There is a certain divinity that shapes all ends." With the sincere faith, self and confidence and belief we established and founded the company under the banner "AMI COOLING SYSTEM", manufacturing our range of products like, water chiller, Air chiller, Compact Chilling Plant, Low - pressure Air - Drier & Thermo Regulation Unit etc.

Our sincere hard work and professional business approach has helped the company to grow & expand by leaps and bounds. We have always kept an open & far sighted crystal clear vision.

## about us

**VISION & MOTTO :** To remain at the pinnacle of success through Excellence in Quality. Ultimate, Enhanced Superior Quality. Ultimate, Enhanced superior Quality endorses our lead products and our market leadership. Our manufacturing unit is well equipped with the modern state-of-the-art technology machineries, and the innovations are incorporated immediately before they become apparent in the market. The system is ably supported by the latest hi-tech infrastructure available, there by, balancing the integral concomitant aspect of the market demand and the production plan & targets. The manufacturing line is managed by highly qualified professional who maintain a stringent quality code. End result Customers' Total Satisfaction. Our conscientious ingenuity has been Generally appreciated & has motivated us.

Our trained engineers will provide after sales service, if the need be. They will also train your personnel for the effective operations. We now look forward to a mutual & long cherished business relationship with your esteemed.

# water chiller

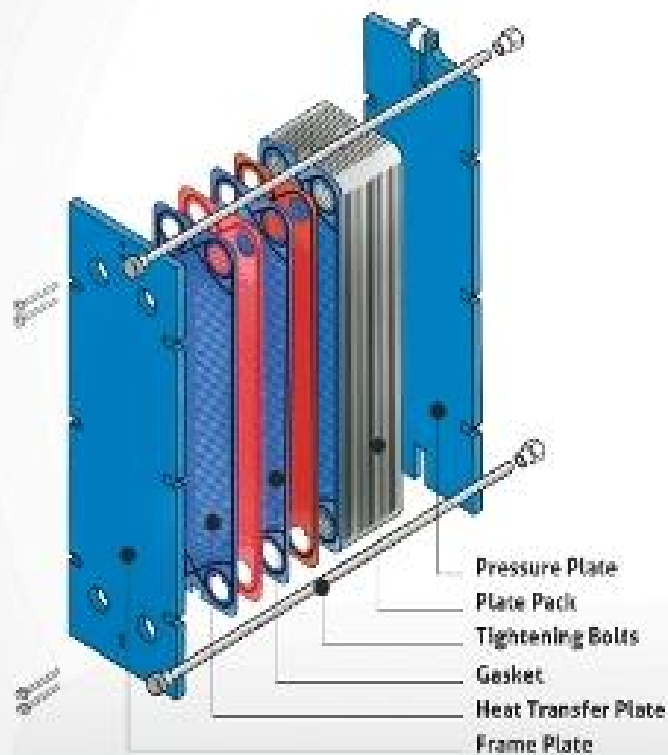

Our precision-engineered range of Water, Oil and Gas chillers are provided with modular remote control system and superior quality water pumps. Easy to install, these chillers save electricity cost and hence are largely demanded in the market.  
0.5 Tr. to 100 Tr. Water Cooled & Air Cooled Chillers.

## shell & tube type heat exchanger

It is the most common type of heat exchanger in Power Plant, Chemical Industry, Textile Industry, Air Condition Industry, Pharma Industry, Food and Beverages, Plastic Industry, Dairy Industry, Laboratory Industry, It Industry, Printing Industry, Refrigerator. And Many More applications.

## gasketed plate type heat exchanger

Ami Cooling System is a leading global provider of gasketed plate heat exchangers all characterized by its compact design and high thermal efficiency. Used in Fluid & Gases, we continuously push technology forward.

## bio gas dryer

The range of Bio Gas Dryer that we offer is mainly used for Gas engine. It adopts heat-absorbing and cool the Gas and remove moisture from gas. It helps to keep the temperature according to useful for gas engine.

## air chiller

The Air Chiller offers energy efficiency that is superior to other chillers using eco-friendly gas. The benefits of Air Chiller innovative technologies.

## eco friendly air cooling system

As the outside air is induced draft the cooling pads, the air changes its characteristic the constant wet-bulb line as indicated on the Psychrometric Chart. This change caused by the vaporization of the water on the pads surface. Result in temperature drop on air.

# mould temperature controller

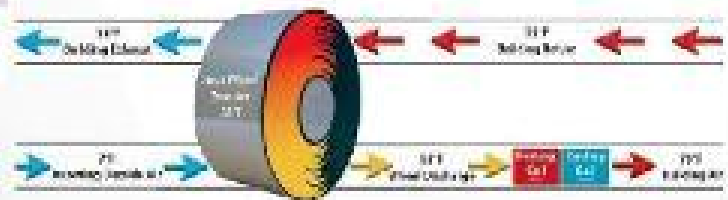

Mold temperature control unit, for the application of different industries, have different terminologies, but also called high light mold temperature, cooling speed hot speed mold temperature.

# enthalpy heat wheel

- => Quite Compact and can achieve high heat-transfer Recovery
- => Achieve a Required Temperature without any energy Losses
- => Save 40 to 60% Energy.

## Energy Recovery Wheel & Air Handling Unit

Heat Recover and Save Energy from Enthalpy Wheel.

## segment we serve

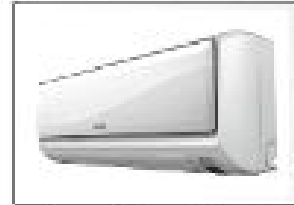

power plant

chemical industry

textile industry

air condition industry

pharma industry

food and beverages

plastic industry

dairy industry

laboratory industry

IT industry

printing industry

refrigerator

and many more...
